DIDSBURY, ALBERTA, THURSDAY, MAY 2, 1929

\$2.00 per Year. 5 cents a copy

LOCAL BASEBALL CLUB ORGANIZES FOR THE SEASON

The annual meeting of the Didsbury Baseball Club was held in the C.P.R. waiting room Thursday evening last, attended by a good representation of players and fans.

The following officers were elected to function for the 1929 season:

Pres., W. J. McCloy.
Vice-Pres., Dr. W. G. Evans.
Sec.-Treas., W. McFarquhar.
Executive: Ward Keith, Cecil Studer, C. Cook.
Manager: H. Lee.

Judging by the names of possible players for Didsbury that were handed in, fans can look for a real classy team and anticipate a good season of baseball.

Extensive Developments Of Tar Sands Planned

Investigation of the bituminous sand deposits in northern Alberta will be undertaken shortly as the first step in the two year program of development of this valuable Alberta resource by the Scientific and Industrial Research Council of Alberta. The work will be conducted under the direction of Dr. K. A. Clark of the University of Alberta who for the past several years has devoted much time to investigations along this line.

The two-year program of tar sands development is an additional feature of the Alberta Government's comprehensive plans for northern development.

Keen interest is also being shown in the soil survey under the direction of Dr. Wyatt, the water survey carried on by Dr. Rutherford, and the pre-Cambrian mineral survey to be conducted by Dr. Cameron during the coming season.

A representative of the Ethyl Gasoline Corporation visited Roger Barrett's garage last week and gave a unique demonstration on the qualities of the red-colored fluid.

Bi-Lingual "Chanty" Sea Discovered

RALPH CONNOR

Ralph Connor, the well known Canadian novelist, collected recently from a half-breed voyageur in the Canadian Northwest a highly interesting folksong which will be sung at the Vancouver Sea Music Festival next January by Ulysse Paquin, of Montreal. This song is half French, half English, the first part being the story of a habitant Colin while the chorus is an English sea chanty. "Blow ye winds of morning". This bi-lingual song appears to have been popular many years ago at a time when white pine was exported in large quantities on the old sailing ships from Quebec which carried overseas the logs rafted down the St. Lawrence from the Ottawa River. The word 'chanty' is considered by some authorities as connected with the 'shanties' of the Quebec lumberjacks who frequently were sailors as well as woodmen and always sang at their work. According to Ralph Connor, the half-breed or metis from whom he recorded this song was a handsome chap with beautiful voice and manners and was a first-class canoe man. A number of purely French Canadian chanties as well will be sung by Ulysse Paquin, at Vancouver, as the intention is to make this Sea Music Festival as Canadian as possible.

A Deleo engine was used in the demonstration, which told its own running story, attentively listened to by an interested audience.

Town Property Re-Assessed

E. B. Nowers, Calgary, Completes Re-Assessment Of Town

The assessment notices have been issued this week, and they are of particular interest in view of the fact that this year the Council, in an endeavor to place the assessment of properties in the town on as equitable a basis as possible, engaged Mr. E. B. Nowers, a member of the Assessment Appraisal Board of the City of Calgary, and a valuator of wide experience, to do the work of assessing.

The assessment notices speak for themselves. In case, however, should there be any confusion, it is pointed out that whereas there appears on the assessment slip the total value of the lots or land, the assessment of the buildings or improvements is two thirds of the actual valuation. This is done in accordance with the Town Act, as the mill rate in this town is levied on two thirds of the value of improvements.

Ratepayers should carefully read the assessment slips, and if they object in any way to the assessment of their properties, promptly lodge a complaint on the form supplied with the Secretary-Treasurer, which will be dealt with at the Court of Revision, when the assessor will be present to meet any of those complaining.

It is all the more essential that ratepayers be satisfied at this time, as when the present assessment is revised and adopted, it will probably remain in force for a period of five years.

Local U.F.A. To Pay Expenses Of Two Students To Capital

In regard to the article in our last issue in connection with University Week at Edmonton from June 5 to 11, we stated that the local branch of the U.F.A. would pay the registration fee of one dollar of any two who were taking advantage of the courses for farmers and farmerettes that week. This should have stated that the U.F.A. local would pay their entire expenses including train fare and room and board as well as the registration fee.

J. D. Thomas, secretary of the Didsbury local No. 12 requests that those contemplating going to the Capital city that week will make their intentions known as soon as possible. Further particulars may be obtained from the secretary.

The W.C.T.U. will meet at the home of Mrs. H. Reiber on Thursday afternoon, May 9th at 3 p.m. The topic is one of considerable interest entitled "Steps toward World Prohibition," and will be presented by Mrs. A. E. Hayes. Our delegate will probably be able to give the meeting some interesting highlights of the convention being held in Wetaskiwin May 2-3. Members and friends are cordially invited to attend.

The McLeod Oil Co., Ltd., of Calgary has issued a public notice, that on and after May 1st, it will discontinue the practice of selling its products to consumers at its wells in Turner valley.

Ina Mae Hummon, Elocutionist, will appear in a rental entitled "Mary Jane's Pa." under the auspices of the I.O.O.F. in the Opera House, Friday, May 10th. Dance after Carstairs Orchestra 18-2c

SIR RABINDRANATH TAGORE

Sir Rabindranath Tagore, aged patriarch and poet of the Indian Empire, who attended and addressed the conference on education and leisure of the National Council of Education held recently in the Hotel Vancouver.

To Rural Telephone Subscribers in Case Of A Fire In Your Vicinity

At the instigation of the Didsbury local, U.F.A., arrangements have been made through Mr. J. Boorman, local agent for the Alberta Government Telephones, for the telephone operator on duty, when notified of a fire in the rural districts, to give one long ring lasting from 20 to 30 seconds, on immediate party telephone lines.

The party that has the fire notifies "central" and she does the rest. After the long ring lift your receiver and await information from central.

You'll howl when you see Buster Keaton as a newsreel cameraman blunder into the midst of a Chinatown tong war. Keaton's latest and greatest gift to his palpitating public, "The Cameraman," at the Didsbury House, Wed., May 8th.

Measrs. John Eubank and Ed Pearson motored to the Calgary Power Co.'s dam at Ghost River on Sunday.

Again we hear the rumor that the Monarch oil field at Sundre is to be opened up again. This time the report comes from a Calgarian, who is in the oil game. Discrediting the rumor, our informer retaliated by saying, "Just wait and see," which will be our natural course — Olds Gazette.

The five months' weekly Wednesday half-holiday commenced yesterday and will continue until the end of September. Whenever a legal holiday intervenes the half holiday in that week will not be recognized and stores will be kept open as usual.

TENNIS CLUB OFF TO A GOOD START FOR THE SEASON

The Didsbury Tennis Club is in action for the coming season. At an enthusiastic organization meeting held Tuesday evening last officers were elected and the matters pertaining to the selection of a location for the new courts were discussed. E. G. Ranton was elected President and E. C. Fletcher, Secretary-Treasurer.

Owing to the distance from the centre of the town it was decided to abandon the courts east of the baseball field in favor of the more convenient location of the skating rink. Two courts have been laid out there and work already been started.

Arrangements are being made to hold a Tennis Dance in the Opera House on Friday, May 17th which should be a popular event.

CARD OF THANKS

We desire to thank all the friends and neighbors who responded so promptly to the fire alarm and came to our assistance last Friday, and especially Mr. McDougall who turned in the alarm. Again we say Thank You.

Mr. and Mrs. R. W. Honey and family.

A very enthusiastic meeting of the local Tuxis Boys group was held on Monday night. The square has now a membership of twelve including the Mentor. The group is planning to go for a camping trip to Fallen Timber on May 24. Next Monday evening the group will meet at the home of Mr. and Mrs. Durrer.

Posters are displayed throughout the province by the provincial government warning the public to observe the provisions of the Prairie Fires Act. Fire guardians are: all justices of the peace, members of the provincial police, R.C.M.P., Dominion forest and fire ranger and councillors of municipal districts a re ex-officio guardians. Penalties not exceeding \$200 and costs may be imposed for infractions of the act, or any regulations framed thereunder.

Husbands, sons and daughters can make a remembrance mark on the calendar that Sunday, May 12 is Mothers' Day.

Constable Dobbin, formerly of Oyen, is now on duty at Olds. The new law upholder comes to Olds with a splendid reputation, and according to the daily press he was feted and banqueted by the citizens of Oyen on the eve of his departure. Constable Dobbin made his first visit to Didsbury last Friday.

Clean up. Paint up. Plant up!

Holeproof Socks

Fancy effects are still the vogue—snappy combinations—pleasing color schemes—and the usual distinct Holeproof quality. See the new jacquard designs knit on special machines—they'll surprise you with the rich looking style they represent. A color and weight for every taste and purse.

Canada At War!

Canada is at war, and with the passing of winter, operations are being renewed and extended on all fronts against the common enemy. Happily, it is not warfare directed against any other people or nation, nor, in the final analysis, is it a destructive, life-taking, money-losing campaign in which the Canadian people are engaged. Rather, it is constructive, life-giving, money-making battle that is being waged.

The war to which reference is made is an unceasing one. It can never end, and victory can never be wholly complete. On the other hand, unless the battle is fought, and renewed from year to year, defeat for mankind is sure and inescapable. It is a case where eternal vigilance is the price that must be paid for life, liberty and happiness.

It is a war against dirt, disease, insects, bacteria. In the spring of the year, as snow disappears and the frost leaves the ground, exposing the accumulations of winter, it is imperative that every householder, every community, "clean up." Failure to do so may, and in all probability will, result in an epidemic of sickness, not to speak of the unwholesome effect upon the mentality and habits of people living amidst unsightly, disagreeable surroundings. The necessity of an annual spring "clean up," and the maintenance of clean surroundings, and sanitary conditions throughout the warm summer months, is applicable alike to the farm and farm home, and the urban community and home.

The danger of the common house fly is now too well known to require emphasis. It is the greatest distributor of the filth and disease breeding germs upon which it thrives and breeds its countless millions. Destroy its breeding grounds and the battle is more than half won. When the first fly puts in an appearance, kill it, and you will be saved the trouble of swatting hundreds later on.

Then there is that most unpopular little humming bird, the mosquito, which turns so many of our long and lovely summer evenings and our beautiful summer resorts and sports grounds into places of torture. By taking early action this almost universal pest can be largely controlled. For years the citizens of Winnipeg have had life made miserable for them by mosquitoes, and each season witnesses more energetic and concerted effort to destroy them. Regina, no worse sufferer than other places, is this year, under the direction of the Kinsmen Club, assisted by other service clubs, the health authorities, Boy Scouts, and other organizations, taking part in the battle.

The mosquito breeds by tens of millions in stagnant water. Pools of stagnant water, slowly drying up sloughs, partially filled ditches, cannot be drained, nor can their existence be wholly prevented, but through the simple expedient of scattering coal oil, and other oils, in these stagnant waters, these millions of potential mosquitoes will be destroyed. Regina is surveying the city and its surroundings from the air, thus detecting every spot of stagnant water, and these are to be impregnated with oil. If all our towns and villages locate these pools of stagnant water in and about them and take like action, life will be made more comfortable and enjoyable.

When cleaning old oil out of your motor car, tractor engine, or other machinery, do not throw it away. Save it, and spread it about in any stagnant water in your vicinity, and sink your old oil-soaked rags with a stone in such pools. By so doing you will prevent the breeding of mosquitoes.

This great and holy war is being waged in other directions and in even intensive fashion. Departments of agriculture, and the research departments of our Universities and the National Research Bureau in laboratories and in the fields, have for some years been engaged in the task of finding a means of eradicating rust from wheat, which takes its toll of tens of millions of dollars from the farmers of the prairies. According to latest authentic reports gratifying progress has been made, and the experts engaged in this work are now fairly confident they are on the right track, and that before long a rust resistant wheat will be developed, fully equal to other wheats in its early ripening ability, in yield per acre, and in its bread making qualities. Such a victory will bring huge rewards for the time and money expended. It is a form of constructive warfare which will reimburse Canada for many of its losses occasioned by destructive human war.

Agricultural and health departments of governments are in the van of this great, never-ending battle. The larger municipalities and many other communities are awakening to their responsibility. Semi-public organizations of many kinds are joining in the fray. As was the case in the Great War, scientists are doing their part, and doing it well. But as the Great War developed into a struggle between peoples, rather than armies and navies, in which every man and woman had a duty to perform, so in this other war in which Canada is engaged, everybody must be enrolled if the largest measure of success and victory is to be achieved. This is a war which recognizes no defined boundary lines; it must be waged everywhere; if the enemy remains unmolested in any one place or district, or even on any individual homestead, victories elsewhere will be of little avail. It is a universal war, demanding the active co-operation and alert vigilance of all.

To Check "FLU," Grippe

Fights the Germs in the Throat Before They Invade Other Parts of the Body.

EFFECTIVE PREVENTIVE MEASURES EXPLAINED

Simple precautions taken now will enable you to fight dreaded "Flu" which is sweeping rapidly through the whole country. The germs of Influenza gain access to the body through the mouth and throat. Keep the throat healthy and you go a long way towards stopping the trouble. An effective means of prevention is to gargle the throat three or four times daily with Nerviline. Half a teaspoonful of Nerviline in water makes a most efficient gargle. The germ-killing properties of Nerviline quickly destroy any bacteria in the mouth or throat. If the chest is sore, if the throat is hoarse, if you have a cough—be sure, to rub the neck and chest with Nerviline. Every drop of it will rub in, and out will come the congestion.

Of course it is absolutely necessary to house-clean the system with Dr. Hamilton's Pills which stimulate the eliminating organs, and rid the system of disease-breeding wastes. This combination treatment of Nerviline and Dr. Hamilton's Pills will give prompt and entirely satisfactory results.

Ahead Of Schedule

First India-England Air Plane Made Trip In Seven Days

The first India-England aeroplane arrived at Croydon two minutes ahead of schedule. The air liner carried five passengers, 500 pounds of mail and negotiated the 5,000-mile trip from Karachi in seven days.

One of the passengers was Vice-Marshall Sir V. Vivian, who left Croydon on March 30 on the inaugural mail liner to India, arriving at Karachi April 6. He departed on the return flight within 24 hours, having thus covered 10,000 miles in fourteen and a half days.

CORNS

Relief in 2 Minutes

Just a drop or two of Putnam's Corn Extractor, and the pain goes away. Relief is almost instantaneous. Removing corns with "PUTNAM'S" is so easy, so sure, so painless—thousands use this wonderful remedy, and say it is the best. Don't suffer any longer, use Putnam's Corn Extractor, the one sure relief for sore corns. Sold at every drug store.

Alberta Coal For East

It is indicated that Alberta's coal shipments to Ontario during the special rate period will aggregate 200,000 tons.

RADIANT GIRLHOOD

Comes Through Rich, Red Health-Giving Blood

A girl with a full-blooded body and vital nerves has the foundation of an active, healthy life. Allow her to grow wan and delicate and prolonged ill-health and general weakness may be the result. Many women who ought to be in the very prime of life are too frequently sufferers of headaches, back and side aches, easily tired and breathless, because of anaemia which stealthily attacked them in girlhood.

But fortunately there is a remedy within easy reach. Thousands of tired, worn-out women and delicate girls who have sought the self-help of Dr. Williams' Pink Pills are grateful for the way in which these pills have restored them to robust fitness. This effective tonic and nerve restorer always helps to make plenty of rich, red blood that speedily puts an end to anaemia. A wan, delicate girl, or tired, weary woman soon becomes brighter when this new blood courses through the system. Color comes to her cheeks and lips; her appetite increases; her nerves are steadied, and she becomes vital and active again. The following is an example, from among thousands, of what these pills have done and can do: Miss C. J. Martin, Kitchener, Ont., says: "For several years I was greatly distressed with pains in the back and sick headaches. I felt tired all the time, did not sleep well and had a poor appetite. I had been doctoring, but did not get much relief. My sister advised me to try Dr. Williams' Pink Pills and after taking six boxes I felt like a new person, and will not be without the pills again."

You can get the pills from your druggist, or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Train Of Tractors

A special train of tractors, valued at \$400,000, recently reached Regina. There were 280 machines in all, occupying 70 railway cars. The tractors were distributed to farmer buyers in Saskatchewan and Alberta.

Miller's Worm Powders do not need the after-help of castor oil or any purgative to complete their thoroughness, because they are thorough in themselves. One dose of them, and they will be found palatable by all children, will end the worm trouble by making the stomach and bowels untenable to the parasites. And not only this, but the powders will be certain to exert most beneficial influences in the digestive organs.

Scientists in Russia are working on a device to keep the blood of a person in circulation and thus prolong life after the heart and lungs have ceased to function.

Mothers can easily know when their children are troubled with worms, and they lose no time in applying a reliable remedy—Mother Graves' Worm Exterminator.

Insanity is said to be decreasing. Maybe it's because so many things that used to be considered crazy aren't any more.

Neuralgia succumbs to Minard's Liniment.

W. N. U. 1783

THE SECRET of Skin and Hair Loveliness

IN THE regular daily use of Cuticura Soap and the occasional use of Cuticura Ointment, women everywhere have discovered the secret of natural beauty. The Soap, fragrant and pure, to cleanse; the Ointment, antiseptic and healing, to remove pimples and irritations. Soap 25c. Ointment 25c. and 50c. Talcum 25c. Sample each free. Address: Canadian Dept. J. T. Wait Co., Ltd., Montreal.

Canada Wins the Banana Trade

Has Largest Banana Carriers Afloat Under Any Flag

The largest banana carriers afloat under any flag is the record claimed by the "Lady Somers" and the "Lady Rodney," the two new vessels of the Canadian National Steamships which went into commission recently. These steamers are equipped with the most modern cooling and refrigeration equipment, and are capable of carrying over 100,000 stems of bananas.

The "Lady Somers" sailed for Bermuda, the Bahamas and Jamaica, inaugurating the western service of the Canadian National Steamships between Canadian ports and the islands.

The ships are elaborately decorated, and the passenger accommodation is complete in every detail. Particular care has been paid to all details of the cargo space and the ship is completely insulated. The "Lady Somers" can carry fruits and vegetables requiring different temperatures. For cool climate the ship is equipped with devices to raise the interior temperature when necessary.

A Real Asthma Relief. Dr. J. D. Kellogg's Asthma Remedy has never been advertised by extravagant statements. Its claims are conservative indeed, when judged by the benefits which it performs. Expect real relief and permanent benefits when you buy this remedy and you will not have cause for disappointment. It gives permanent relief in many cases where other so-called remedies have utterly failed.

Exports Tea In Lumps

China exports tea in solid lumps, like bricks, for consumption in Tibet and Siberia. The tea-leaves are pulverized, mixed with water, and moulded into hard cakes. The bricks weigh about 5 lb. each. In this form tea can be carried overland more easily, as it occupies less space.

"We are now," announced the guide, "passing through a rural hamlet."

"Oh," exclaimed the sweet young thing, "I thought a hamlet was a little pig!"

Had Many Rulers
Warsaw, the capital of Poland, has in turn been ruled by Sweden, Austria and Russia. In 1807 Napoleon made it the capital of the Duchy of Warsaw and during the World War it was captured by the Germans, who held it until peace restored Polish independence.

Nervous and Run Down The Least Noise Would Bother Her

Mrs. R. Burton, Oshawa, Ont., writes:—"Three years ago I was so nervous and run down I could hardly bear to have the children make a noise it would bother me so."

"A friend advised me to take

and after taking two boxes I began to feel stronger, looked better and the color came back into my cheeks, and now I am feeling fine again." Price 50c. a box at all druggists and dealers, or mailed direct on receipt of price by The T. Milburn Co., Ltd., Toronto, Ont.

Religious Groups In House
Roman Catholics form the largest religious group in the Canadian House of Commons, about 30 per cent. of the total membership. Adherents of the United Church come next and Presbyterians follow.

Medicine Chests

Are not complete without Minard's. Used for cuts, bruises and pains of all descriptions.

Make Sure Your Fence Is FROST TIGHT LOCK!

Your fence requirements on the ranch are no small item; you want your fence to last a lifetime. Put your faith in Frost Fence; more than 25 years of square dealing with the farmer are behind it. There is only one Frost Fence, only one Frost Lock, the lock that HOLDS under all Western conditions of strain and extremes of temperature. If there is no Frost dealer in your neighborhood, write to our nearest office.

ITALY DEMANDS EQUALITY AS TO NAVAL POWER

Geneva.—The problem of navy parity between France, and Italy loomed out as a reef which might imperil the success of any five-power naval conference to reduce armaments.

Premier Mussolini is reported here as firm as a rock in demanding parity for Italy with France, both on land and sea, while France apparently fails to see the justice of such demands.

France thinks her communications with her extensive colonial possessions and her mainland open to two oceans are sufficient reasons for her having naval forces superior to Italy's.

This problem of satisfying Italy at least on paper is worrying delegates to the preparatory disarmament commission. Some are beginning to worry whether a real advance on the naval problem could not best be made by establishing first of all an understanding between the United States and Great Britain.

The Associated Press correspondent has received the impression that France would place no obstacle in the way of such a preliminary understanding if it did not affect her position in relation to other continental powers. A high French authority voiced recently enthusiastic approval of the speech of Hugh S. Gibson recently, because it gave a magnificent impetus to reduction in armaments as a whole.

This personality explained that France desired to hasten general reduction in armaments and hoped that delegates would even be able to submit a draft treaty to the September assembly of the League of Nations, thus permitting an international conference by 1930. This would involve a second session of the preparatory disarmament commission during the present summer, until which time he thought the naval question had better be adjourned.

Agrees With Gibson's Speech

British Government Shares Wishes Of U.S. On Disarmament

London, England.—Sir Austen Chamberlain, British foreign secretary, told the House of Commons that the British government shares fully the hope and wishes of the United States government on disarmament as set forth in Ambassador Gibson's speech at Geneva.

"The government desired me to take this opportunity to express its warm appreciation of the cordial conciliatory spirit shown by the American delegates and give assurances on its behalf that in the same spirit and with the most earnest wish to reach a complete understanding it will consider the American suggestions," declared Sir Austen.

Sir Austen made his statement in answer to a question by Commander Joseph Kenworthy, Labor, whether Ambassador Gibson's speech had been called to his attention and what response his majesty's government proposed.

Airmen Killed At Toronto

Machine Went Out Of Control and Crashed Near Flying Field

Toronto.—Noel Marshall and William MacKenzie, residents of Toronto, were killed when their aeroplane went out of control and crashed near the Leaside flying field.

It was reported that MacKenzie, who had but recently been granted a pilot's certificate, was in charge of the Gypsy Moth plane, with Marshall a qualified pilot, as a passenger.

The plane was said to have been but 150 feet from the ground when it went out of control and crashed with such force the engine buried itself.

British Election In May

London, England.—Premier Baldwin announced in the House of Commons recently the prorogation and dissolution of parliament for May 10, nominations for seats in the House on May 20, and polling on May 30.

W. N. U. 1783

Win Empire Competition

King's Trophy In Rifle Match Goes To South African Cadet

Ottawa, Ont.—Cadets from South Africa won the King's trophy in the rifle match in 1928, which was participated in by 33,000 boys from all parts of the Empire. Canadian cadets won this trophy in 1927, and finished second in 1928. The results have just been made public by the National Rifle Association.

Commenting on Canada's performance the National Rifle Association report says: "Not only does Canada possess many more brilliant individual shots than any other country but she has a limited number of units capable of achieving very special distinction. When mass efficiency becomes the principal object of the many and fewer low scores have to be included in her national team, the premier prize, the King's trophy will return to the Dominion."

While Canadian boys have lost the King's trophy they have had other remarkable successes in the match. They won 82 silver medals which are awarded for scores of 99 and 100 points, and 152 bronze medals for scores of 97 and 98. The rest of the empire combined won a total of only 124 of these medals.

SUNDAY SCHOOL LESSON

MAY 5

WHAT HILKIAH FOUND IN THE TEMPLE

Golden Text: "Thy word is a lamp unto my feet, and light unto my path."—Psalm 119:105.

Lesson: 2 Chronicles 34:1-33.

Devotional Reading: Psalm 19:7-14.

Explanations and Comments

The Temple Repairs Which Led To the Finding Of the Book Of the Law, verses 8-13.—When twenty-six years of age, Josiah turned his attention to the ruined temple and had it repaired. He placed in charge of the work the governor of Jerusalem, the official secretary and the official historian. They handed over to Hilkiah, the high priest, the money which the people brought to the temple and gave to the Levites who were appointed to receive it. The overseers were Levites; other Levites encouraged the workmen with music; yet other Levites were scribes and officers and porters. The work was done faithfully and progressed rapidly.

The Finding Of the Book Of the Law, verses 14-16.—During the work upon the temple, Hilkiah, the priest, found the book of the law of Jehovah given by Moses. This is believed to have been the legal portions (chapters twelve to twenty-six, and chapter twenty-eight) of our Book of Deuteronomy, which calls itself "The Book of the Law" and also "The Book of the Covenant." Some scholars believe that this had been long known, but had been forgotten during the idolatrous reigns of Manasseh and Amon, and Hilkiah found the copy in the temple and read it to Josiah for the first time. Others hold that it was "a new and enlarged edition of the Book of the Covenant prepared for the needs of the times, and brought forth now because Josiah was a righteous king and would enforce its decrees." Dr. George Adam Smith points out that it is precisely from this time onward that the style and phraseology which are characteristic of Deuteronomy begin to affect the literature of Israel.

The Effect Upon Josiah Of the Reading Of the Book Of the Law, verses 17-21.—After telling the king that the work upon the temple was progressing well, the money having been given to the overseers and the workmen put at work, Shaphan spoke about the newly discovered book and read it aloud (the entire roll, according to 2 Kings 22:10). On hearing the words the king rent his robes in token of his troubled mind. "For," he said, "great is God's wrath against us, because our fathers have not done as this book commands." If we would see the effect the book must have had upon the susceptible soul of Josiah, we are advised to read chapters 22-26 of Deuteronomy ourselves with Josiah and his times in mind. The book contains explicit directions as to worship and conduct, and the penalty of national disobedience decreed was the loss of home and country. "For many generations warnings and precepts alike had been neglected, and when the day of doom should come, the sins of the fathers should be visited upon the children. Could the doom be averted by speedy and complete obedience and penitence?"

"It is not enough to read our Bible. Its messages must be heeded. Learn and observe these words found in an old Bible:

When thou redest what here is writ, Let thy best practice second it; So twice each precept read shall be—

First in your books and next in thee.

A CHARMING PRINCESS

Princess Ingrid, only daughter of the Crown Prince Gustaf Adolf, of Sweden, whose engagement to the Crown Prince Frederick, of Denmark, has been reported from Stockholm.

Will Perform Election Duties

King George Desires To Carry Out Usual Royal Functions

Bognor, Sussex, England.—The steady progress being made by the King is permitting the drafting of tentative plans for future functions, and there is every prospect these will be carried out. Transfer of the court from Bognor to Windsor Castle before Whit Sunday, May 10, is contemplated in view of His Majesty's expressed desire to carry out the usual royal functions connected with a general election. The King will remain at Windsor Castle until the political situation permits him to go to Sandringham in Norfolk, where the east coast sea air has always agreed with His Majesty.

It is being suggested that a thanksgiving service for the King's recovery should be held in Westminster Abbey at the end of July, with similar services in other large cities.

Calendar Expert At Ottawa

M. B. Cotsworth Discussed Matter With Government Members

Ottawa.—To aid in the suggested establishment of a national committee in Canada to consider proposed calendar reform and its effect on the Dominion, M. B. Cotsworth, of Rochester, N.Y., originator of the 13-month calendar idea, has paid a special visit to Ottawa. Mr. Cotsworth conferred with Dr. O. D. Skelton, under-secretary of state for external affairs, and H. H. Coats, Dominion statistician, respecting his proposition.

Organize Wheat Pool

Lincoln, Neb.—Wheat-raisers of Nebraska and Wyoming to the number of 200 have effected organization of a wheat pool, giving it the name of the Middle West Market Association non-stock co-operative. The Pool was said to represent 13,000 grain raisers in the two states and was declared to be the largest in the middle west.

MORE NORSEMEN FOR THE WEST

This photograph was taken at Winnipeg after the arrival of the first immigrant special train this season, over the Canadian National Railways, March 20. There were 205 broad-shouldered Scandinavians in a total of 369 arrivals, which included 22 British settlers. Two trains, which followed the first special a day later, brought the total of new-comers up to nearly one thousand. At least half were Scandinavians. All the immigrants have been placed by the Canadian National Railways' Colonization Department.

Germany Wants Aerial Bombs Abolished

But Objections Were Raised By Several Countries

Geneva.—The German proposal to abolish the use of aerial bombs in warfare was defeated before the League's preparatory commission on disarmament. Only five countries were in its favor—Germany, Sweden, Holland, China and Russia. Those against it, including Canada, the U.S. and Great Britain, registered their objections with a rider that a negative vote was not to be interpreted as in any way authorizing the use of aerial bombs against civil populations.

Count Von Bernstorff, of Germany, pointed out the toll that could be exacted by bombing planes over Paris, Berlin and London, and said that this method of warfare was horrible and cowardly, because the combatants were protected by defensive appliances.

F. Sokal, of Poland, said no one would deny the horror of such methods but the conference had not reached that point and under the Kellogg anti-war pact was not likely to reach it. When war had been outlawed, it was logical to begin codifying rules of war, he remarked.

M. Litvinoff, of the Soviet, here interpolated that Poland was among those who last year rejected the Russian proposals for complete abolition of armaments.

Answers King's Message

Viscount Willingdon Sends Reply On Behalf Of Dominion

Ottawa.—On behalf of the Canadian people, His Excellency Viscount Willingdon, governor-general of Canada, despatched a message to His Majesty King George, expressing joy over the "glad tidings" contained in the affectionate cable sent by His Majesty to his subjects throughout the Empire.

The message follows:

"Your Majesty's word will be received with the greatest joy and gladness by your loyal people of Canada on whose behalf I beg very respectfully to thank you for the glad tidings contained in your beautiful message. During the past months we have been filled with anxiety and sympathy over your majesty's serious illness. We can now rejoice that your majesty is well on the way to recovery and that her majesty has been relieved from the strain of anxiety which has enlisted our deepest sympathy. We trust before long to have the opportunity of joining with all your majesty's subjects throughout the Empire in a prayer of thanksgiving for your safe recovery and in a profound hope your majesty may long be spared to reign over your loyal and devoted subjects."

Receives Fellowship

Saskatoon, Sask.—Dr. William Allen, professor of agricultural economics at the University of Saskatchewan, has had a fellowship conferred on him which will meet the expenses of attending a conference of agricultural economists to be held during August in Devonshire, England.

ANTI-SMUGGLING TREATY MAY GO TO ARBITRATION

Washington.—Terminating the diplomatic correspondence on the "I'm Alone" sinking, Canada replied to the United States rejoinder to the protest against the sinking by coast guards' gun fire on the high seas, of the Canadian schooner suspected of conspiracy against American liquor laws.

Hon. Vincent Massey, the Canadian minister, delivered to Secretary Henry L. Stimson, a note which is expected to reveal the Dominion's attitude to the "I'm Alone" case in particular, and the scope of the anti-smuggling treaty of 1924 in general.

It is generally accepted here that the United States wants the case to go to arbitration. It is expected Canada will accept. Arbitration probably will proceed under the provision of the 1924 treaty itself, which leaves any dispute over the seizure of a ship to a tribunal composed of representatives of both countries.

Because of the whole question of the right of "hot and continuous pursuit," under the treaty will be involved, the importance of the negotiations will transcend the single case of the "I'm Alone."

The British government is sitting back and letting Canada fight the case because the ship is of Canadian registry. But the decision will affect some far-reaching questions of territorial waters, and United States rights under the special treaty to claim the 12-mile limit specified in its own tariff act.

The treaty was signed by Great Britain, and technically London would have the right to say who would represent the British Empire on the arbitration board. It is likely that some prominent Canadian will be appointed, however, and he will serve for the Empire.

It is suggested here that the former secretary of state, Frank B. Kellogg, may represent the United States.

Convict Train Travels West

Seventy Prisoners Are Sent To Stony Mountain Penitentiary

Winnipeg.—The convict train, bearing 170 prisoners from Kingston, Ont., to western penitentiaries, reached here recently. Seventy prisoners were immediately transferred to Stony Mountain penitentiary, a few miles north of Winnipeg, while the remaining hundred continued the westward journey to Prince Albert penitentiary.

The convict train consisted of four steel coaches, the windows of which were heavily barred. Guards armed with rifles, were aboard the train, while during the stop here forty provincial policemen, also armed with carbines, stood guard.

The journey from the penitentiary at Kingston was uneventful, according to the prison guards.

Succeeds Lord Revelstoke

Paris.—Sir Charles Addis, director of the Bank of England, and noted English financial expert, has been appointed to succeed Lord Revelstoke as head of the British delegation at the conference on reparations. Lord Revelstoke died suddenly on April 19, wearied by the commission's abortive attempts to reach some settlement of the tangled problem of German payments.

Message For American People

San Francisco, Calif.—Sir Rabindranath Tagore, Indian poet and philosopher, sailed aboard the liner "Taylo Maru" for India, via Hong Kong. His final words to the American public were the expression of a wish that his people "would rise above indignities and insults to impart some beauty to the utter ugliness of the industrialization of the West."

Gibson's Proposals

Geneva.—It was understood here that Ambassador Hugh S. Gibson, American spokesman at the preparatory disarmament conference, would prepare a memorandum outlining United States disarmament proposals and hand this later to delegations

A TOWN'S BEST BOOSTER

A writer in a current magazine observes: "If the newspaper is just a little better than its town, the latter is the gainer thereby."

Towns and their newspapers usually lag or lead together. Progressive journalism is the unfailing tonic of the lethargic community, but it is equally true that a lifeless newspaper can seriously retard the development of its community.

There is no better community asset than a newspaper equal to the needs of the community. While a poor newspaper is better than none to the individual reader, that does not hold true for the town.

What can a good newspaper do for its community? It can serve as the town's messenger to the outside world. It must take the leadership in all community projects if they are to be successful. It is the infallible line of communication between local government and citizen. It is to the newspaper that all organizations turn for assistance in public welfare movements and without that assistance they face failure.

The newspaper reaps the reward of its initiative by sharing in the general improvement of business and community affairs it has been instrumental in bringing about. The good newspaper deems it a pleasure to serve its community and its readers and is fully aware that it is only through giving a full measure of service that it can progress and prosper.

TABOO GRAVEL ROADS

All Western Canada will watch with interest the pending session of the Minnesota state legislature when a new road policy may be adopted. As the further use of gravel on the trunk roads of that state has been challenged, it may embark upon a scheme of concrete highways for the future.

Commissioner Babcock has reported to the state authorities that the growing numbers, more extensive use, greater speeds and heavier loads of motor vehicles have increased wear and tear upon the main highway to such an extent that he considers it sheer waste of money to try and maintain the more important stretches as gravel highways.

When the commissioner's report was made, newspapers in Minnesota said the only sensible thing to do was to offer a \$20,000,000 bond issue so that concrete highways could be constructed.

In Alberta and in other parts of the west, this is looming up as a most important problem. Future roads have to be built, not only for the ordinary motorist, but also for the movement of goods by motor truck. This means that the solution will rest with permanent highways of concrete, which will be cheaper in the long run. This problem has been brought to the government's attention by the Alberta Motor Association on more than one occasion, and it is demanding action today just as much or even more than ever before.

DRIVERS' TESTS

In the amendments to the Motor Vehicles Act to provide for the licensing of drivers, it is stated that the Minister may refuse a license if

LOCAL & GENERAL

Mr. Allen Hunsperger was a business visitor to Olds last week.

Mr. and Mrs. Hall and family left on Wednesday for Kitchener.

Mr. W. A. Austin was a business visitor to the southern city on Thursday of last week.

Mr. J. W. Phillipson was a business visitor in Calgary Tuesday and Wednesday.

The Didsbury W.I. will hold a tea and sale of Home Cooking on Saturday, May 4th, in the Opera House. 17-2c

Mr. K. A. McLeod of Edmonton, was a Saturday visitor at the home of his sister-in-law, Mrs. E. G. Ranton.

Now William Haines' most thrilling and entertaining picture, "Alias Jimmy Valentine," at the movies, Saturday, May 4 at 7:30 and 9:30 p.m. No detectives can catch him, but when he looks into a pair of lovely eyes—well!

he is not satisfied of the applicant's competency. It is assumed, therefore, that clothed with that power, the department will set up proper machinery for examination purposes prior to the new regulations becoming effective next July 1.

There is no doubt that there has been a lack of education on the part of many drivers, and this has been the cause of a large percentage of accidents in this province.

In some places, operating under a license system, a person who has been operating a car for five years and has not been involved in an accident is granted a license without examination. It is likely that in this province there will be some general policy to cover persons whose ability to operate a car properly has never been open to doubt.

Any examinations should bear on the following points, in the opinion of experts.

(a) The rules of the road, the mechanism of the machine, how to create, transmit and control the power, the use of lights and brakes, the ability of the operator in congested traffic and at dangerous points on the road.

(b) The occasions when the operator should show common sense and courtesy when driving.

(c) His eyesight, his hearing, his ability to use hands and feet, his mentality and his state of nervousness.

A candidate unsuccessful on the first point should be told to go to an instructor and be educated on parts of the examination in which he was found deficient.—Good Roads Magazine.

Clean up, Paint up, Plant up!

THE NEWSPAPER AND SALES

Modern life is much different today from what it was a decade ago. Today, a great deal of buying is done over the telephone.

This, in turn, means that opportunities for purchases advantageous to the buyers are now almost completely centered in newspaper advertising.

The modern housewife knows what she wants, knows by brand name, and orders in that manner—because advertising has taught her how she should do it and why it is profitable for her to do so.

Imagine ordering from an unknown grocer "some breakfast food," "some bacon," "some coffee," "some bread"—and so on, as in the olden days before national advertising became the powerful force it is today.

MORE GAME BIRDS TO BE IMPORTED

Some 2,000 Chinese ring-necked pheasants, 600 Mongolian pheasants and 3,000 pheasant eggs for hatching will be brought into Alberta this year, states C. A. Hayden, President of the Provincial Fish and Game Association. It is reported that the pheasants placed in several districts in the province last season have wintered very well and it is hoped that through the activities of the association and a number of local bodies, the supply of these desirable game birds will be greatly increased within the next few years.

THE products you see consistently advertised in this paper are worthy of your confidence.

It takes two things to make a consistent advertiser. One is a strong conviction that he has a product that will hold its place in public favor despite competition. The other is actual proof that of . . . the increasing popularity of his product.

If his product will not stand the test of comparison he would simply be throwing his advertising investment away. If the buying public rejects his product after it has been offered in advertising he has thrown his advertising investment away.

That's why the manufacturer, the merchant, who advertises his merchandise consistently is very sure of his quality . . . and why you may be sure of it too.

ITEMS OF INTEREST

Unprecedented demand for homestead lands in northern Alberta is indicated by the records at the Dominion Lands agencies at Peace River and Grande Prairie for the fiscal year ending March 31, 1929. At the Peace River office a total of 3,024 entries for 2,869 homesteads and 155 soldier grants were made during the above period as compared with 854 homestead entries and 48 soldier grant entries or a total of 902 for the preceding year. At the Grande Prairie agency 2,396 entries were made during the fiscal year of 1928 as against 958 in 1927.

Alberta's Weed Problem, Bulletin No. 3, has recently been issued by the Field Crops branch of the Alberta Department of Agriculture and is now available for distribution through the office of W. J. Stephen, Field Crops Commissioner, Edmonton. This publication brings up to date much valuable information dealing with the control and eradication of noxious weeds in the province, and will be read with attention by farmers and others interested in this problem.

Marking the beginning of a considerable movement of people of French-Canadian origin who are returning to Canada from the New England states, a party consisting of 187 new settlers

PRAIRIE FIRES CAUSE SERIOUS LOSS YEARLY

Several serious prairie fires in the southern part of the province have resulted in considerable destruction of farm property as well as grass on the ranges. It is pointed out by Benj. Lawton, Provincial Game and Fire Commissioner, that those who find it necessary to set fires should take every precaution to prevent it from escaping, and anyone driving through the country should refrain from throwing lighted matches and lit cigar or cigarette stubs away before they are extinguished.

The burning of stubble on grain fields in the past has resulted in considerable damage from fires which have been allowed to escape. It is considered that the long stubble and straw left on grain fields where combine harvesters have been used may prove to be even a more serious menace where this is burned preparatory to plowing. It would be well for all who find it necessary to burn stubble of this kind to take special precautions even in addition to those provided for by The Prairie Fires Act.

Where burning is to be done at any season of the year for the purpose of destroying stubble, straw or brush, or where it is considered necessary to utilize fire for the clearing of land, a fire guard is required, and the fire in every instance must be watched by three adult persons, equipped with suitable appliances for the extinguishing of fire, and the fire must be watched and guarded until it has been extinguished. A fire guard must be provided before kindling any such fire and must be ten feet wide if burning is to be done before May 7th, and twenty feet wide if it is to be done after that date.

Glycerin Mixture Stops Constipation

The simple mixture of glycerin, buckthorn bark, saline, etc. (Adlerika) acts on BOTH upper and lower bowel and relieves constipation in TWO hours! Brings out old waste matter you never thought was in your system. Don't waste time with pills or remedies which clean only PART of the bowels, but let Adlerika give stomach and bowels a REAL cleaning and see how good you feel.

passed through Edmonton this week on their way to a number of districts in the Peace River country. Settlement will be principally in the vicinity of Kathleen, south-east of McLennan, where a new parish is being established. Included in the party were a large number of young married men well equipped with capital who will return for their wives and families after homes have been prepared on the farms selected in Northern Alberta.

NO WONDER

A man was one day visiting a lunatic asylum and while walking in the grounds he met a patient to whom he said:

"Well, how did you get here?"

The man replied: "Well, sir, you see I married a widow with a grown-up daughter, and then my father married my wife's daughter, that made my wife the mother-in-law of her father-in-law, and my father became my step-son. Then my step-mother, the daughter of my wife, had a son, and that boy, of course, was my brother, because he was my father's son; but he also was my wife's step-son, and therefore, her grandson, and that made me the grandfather of my step-brother. Then my wife had a son, so my mother-in-law, the step-sister of my son, is also his grandmother, because his step-sister is his wife. I am the brother of my own son, who is also the son of my step-grandmother. I am my mother's brother-in-law, my wife is her own child's aunt, my son is my father's nephew, and I am my own grandfather. That's one reason I am here, sir."—Answers.

MUSHER MAD

"Quebec", says Sara Hamilton Birchall, in "Country Life", "goes musher mad". It is so. Every year, and this one more than ever. Go to Quebec between February 21st and 23rd. All you will hear is dog, dogs, huskies, mushers, St. Godard, Nolan, Chevrier, Soppala!—a score of other names. You will look at the big board in the Chateau lobby whereon the odds are shown, and you will wonder what it is all about. And then, perhaps, an enthusiastic soul will get you in a corner and tell you how on the third day of the last derby, the man who was considered in the running only for second place was held up by a freight train so long that his dogs shivered and began to stiffen, but won the 120 mile three day grind by a short minute or so; and how he was cheered and chaired, and how they come, these mushers, from all parts of the North Country, with their dogs and hounds and huskies. You will pick your dogs, Siberians, Alaskans, or just plain dogs, and before the last entrant has started on the first lap on the first day, the fever will have caught you. You will see the first team drive panting home, the next and the next; the heroes

of Nome, the trail dogs from Le Pas, fuzzy animals who know the Quebec woods trails and teams of dogs bred, reared and trained for this one great derby, dogs you wouldn't want, worth hundreds; dogs you could love, but who only know a trainer's hand, and will give allegiance but to him; dogs in fours and fives and sixes, straining, eager, panting dogs with forty miles behind them and eighty before. Then you too are musher mad, and the rough, shaggy individual in fur and wool, whose moccasined feet had not yet fitted into your own ideas of things becoming, is invested in the aura of a hero and a knight. You scream

his name as he mushes past. You hold your breath as the minutes tick before the next arrival. A team of mastiffs, greyhounds or mongrels, swings round a corner into sight. Their time is close. They have one minute in which to reach the goal, and win the first lap. You too, are musher mad. You watch the bulletin boards with excitement and wordily exchange the gossip of the racing stables. Then, when the great exhibition of strength and endurance is over, you can perhaps settle down to enjoy Quebec herself and those winter sports in which you are permitted to take a personal if not more strenuous part.

BEAUTIFY CANADA

Clean Up, Paint Up, Keep It Up --- Increases the Value of Your Property

When Pain Comes

What many people call indigestion very often means excess acid in the stomach. The stomach nerves have been over-stimulated, and food sours. The corrective is an alkali, which neutralizes acids instantly. And the best alkali known to medical science is Phillips' Milk of Magnesia. It has remained the standard with physicians in the 50 years since its invention. One spoonful of this harmless,

tasteless alkali in water will neutralize instantly many times as much acid, and the symptoms disappear at once. You will never use crude methods when once you learn the efficiency of this. Go get a small bottle to try. Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore..

Increase in Gold Supply

Was Greater By Sixty-One Million Than Amount Minted in 1928

Gold holdings in the United States at the end of 1928 were reported by the federal reserve board in the April issue of its bulletin to have been 37.6 per cent. of the world's total, which amounted to \$9,981,000,000.

The total gold supply was compiled from reports transmitted to the board from 40 countries and shows that the increase in gold of \$466,000,000 in a year was greater than the amount of gold minted during the year by about \$61,000,000. The increase was made, the report said, even though about \$50,000,000 was absorbed by Great Britain and an unknown amount taken away for industrial consumption.

Draws Attention To Peace River District

Has Room For 2,000,000 People Says Major-General McRae

Major-General A. D. McRae will again draw the attention of parliament to the colonizing possibilities of the Peace River country. His visit to that area last year has more than confirmed his previously expressed opinion that 2,000,000 people can find homes for 400,000 farms of 240 acres each. General McRae will urge greater railway facilities, modern methods of preparation of scrub land and a national colonization and settlement policy extending over ten years.

"Have faith in your fellow man," says a paragraphist. But be sure you get his signature on the dotted line.

Keep Your Farm Up-to-Date This Inexpensive Way

For Farm Homes

Faded or cracked walls and ceilings detract from the pleasure of farm life. Hundreds of farm owners, realizing this, have transformed their rooms into bright, colorful interiors by applying Gyproc over all the old, ugly surfaces—then decorating. Remarkably attractive results are thus achieved at small cost. Every room becomes much more beautiful, livable and up-to-date.

Barns and Poultry Houses

Gyproc lined barns and poultry houses provide the best protection against fire, cold, heat and vermin that your stock can have. You can erect strong, rigid Gyproc sheets yourself in short time and at little expense. After a few months you will be delighted with the improved health of your cattle and the increased laying capacity of your flock.

Utilizing Waste Space

Those musty, inaccessible waste spaces in your attic and basement! Why not convert them into extra rooms by erecting Gyproc walls and ceilings? You can have a playroom, a laundry room, a workshop, a special preserving closet or any other kind of room you wish.

For fast, economical, fire-proof construction on the farm there is nothing to equal Gyproc. Write us for information or see your nearest Gyproc dealer.

Airplane On Submarine

Big Innovation Has Been Added To Italy's Newest Craft

Italy's largest and best equipped submarine, the Franco Tosi, has been launched at the dockyards at Tarento, Italy. The submarine has two 3,000 horsepower Diesel engines of special designs which can be used separately or together, and which give a surface speed of 19 miles an hour. Two electric motors of 1,000 horsepower each propel the submarine at a speed of ten miles an hour under water.

The submarine's artillery is one anti-aircraft gun and several machine guns. The submarine is to carry a seaplane in a large tube adjoining the turret, a big innovation in submarine technique. The tube is able to resist over 300-foot depth water pressure.

THESE SIMPLE RULES MAKE TEETHING EASY

Be careful of Baby's diet during teething. Do not overfeed him. Watch his stomach and bowels and at the first sign of indigestion, gas or constipation, give him a few drops of harmless, pleasant-tasting Fletcher's Castoria. These simple rules are making teething easy on millions of babies—and mothers, too. For over thirty years Castoria has been the trusted standby of mothers everywhere. It soothes wakeful, cross babies to sleep quickly and easily—and it's purely-vegetable so you can give it as often as needed. It does the work of castor oil better and more gently. For your protection, the bottle of genuine Castoria always bears the Fletcher signature.

Minerals In Alberta

Alberta is famous for its vast resources of coal, for the rapid development of its oil and gas resources, and for the extent of its unique deposits of bituminous sands.

A GREAT PUZZLE TO CAREFUL PARENTS

One of the greatest puzzles to the careful parent is to know just what medicine to give the little ones. When the child falls ill with gripping pains; is seized with cold or fever, refuses food or vomits what he has taken, when he cries a great deal and cannot get the sleep so necessary to the growing child, the parent is in a quandary. What is to be done on such occasions? As often as not there is not a suitable medicine in the house. The puzzle is what to give him to set him right quickly.

It is to meet such emergencies that Baby's Own Tablets were designed. These pleasant little Tablets quickly reduce fever, break up colds, relieve constipation and indigestion and allay teething pains. They quiet the nerves and promote restful health-restoring sleep. They are guaranteed absolutely harmless and safe for even the youngest and most delicate baby.

Baby's Own Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

The oldest steamship in the world is said to be the barque "Constance," built in 1723, and now in use as a training ship at Copenhagen.

Minard's Liniment for cuts and bruises.

Canada's Forest Products
One freight car in every six in Canada is loaded with forest products.

An Oil For All Men.—The sailor, the soldier, the fisherman, the lumberman, the out-door laborer and all who are exposed to injury and the elements will find in Dr. Thomas' Electric Oil a true and faithful friend. To ease pain, relieve colds, dress wounds, subdue lumbago and overcome rheumatism, it is excellent. Therefore, it should have a place in all home medicines and be amongst those taken on a journey.

The bones of an average man weigh twenty-five pounds.

Minard's Liniment—good for tired feet.

W. N. U. 1783

Make Your Priming Coat

By a primary coat is meant the first, or primary, coat of paint or varnish on any surface of wood, metal or plaster. The first object of the priming coat is to stop most of the suction, present to a great extent in wood and plaster, so that the finishing coats will stand out with a uniform degree of gloss, or, in the case of flat-wall paint, with a uniform degree of flatness.

In this connection, please note that no such uniformity can be obtained until the porous nature of the surface, or suction, has been satisfied. In the case of metal surfaces the degree of suction, or porosity, is far less noticeable; therefore, such surfaces will naturally call for a different priming treatment.

The second object to be aimed at in the first class priming coat is a proper degree of penetration of the face, so that the paint will to the greatest possible extent become a part of the surface—not merely so much pigment and oil spread out on top of, and insecurely bound to, the surface.

Bearing these objects in mind, the salesman will readily understand that a thick priming coat cannot possibly be a good priming coat. Why? Take the first object outlined above. If a thick priming-coat is applied on wood or plaster the porous nature of the surface will suck away most of the oil from the paint, which, mind you, needs just this quota of oil to bind it and form a good film. The result is, that instead of having stopped the suction, you have merely superimposed another surface, porous in nature because it has been deprived of too much oil and insecurely bound to the surface for the same reason—and that also kicks the props from under our second support—the second object.

So we arrive at the natural and logical conclusion that priming coats on wood and plaster must be thin coats—it is almost impossible to get them too thin. If a priming coat can be said to be too thin, such a claim can only be advanced from the covering or hiding viewpoint—a defect which can be easily remedied by an additional coat. But if too thick a priming coat is applied, a dozen coats will not cover up the blunder, because it will be exposed by the almost inevitable result—peeling of the paint from the surface.

When in doubt—thin priming coats.

Soldiers' Settlement

31,360 Veterans Have Been Settled On Farm Lands

Veterans to the number of 31,360 have been settled on farm lands, with and without loans, under the Soldiers' Settlement Act, according to a report tabled in the House of Commons. No fewer than 6,652 of these men established themselves without financial assistance from the Government. More than 6,000,000 acres in all, at an average price of \$10 per acre, have been bought or homesteaded by the Vets.

Dean (to Frosh): "Do you know who I am?"

Frosh: "No, I don't, but if you can remember your address, I'll take you home."

CHAPTER XVIII.—Continued

Donald's heart ached for this man, whose great love for his wife was as passionate at this moment as when she was living. "How he loved her!" he thought.

When Walnwright spoke again his voice was spiritless. "You are the first person to whom I have spoken of my past; even Constance does not know." As he turned to leave Donald gripped his hand in silence, but with a pressure eloquent of heart-felt sympathy.

Andy had noticed Donald's increasing interest in Connie and had wisely refrained from accompanying him on his nightly visits. On this particular night Donald came into the kitchen whistling a lively air, his face wreathed in smiles. He slapped Andy heartily on the back as he asked him for a lunch. His gaiety was so pronounced that Andy studied him closely.

"You look 'appy, Donnie," he remarked.

"I am, Andy; I'm the happiest man in the world."

He finished eating, then sat staring dreamily at the smoke of his cigarette as it circled about his head. Andy discoursed lightly on various subjects, but Donald did not seem to hear him. After he left Andy

TIRED, WEAK, NERVOUS WOMAN BENEFITED

Praises Lydia E. Pinkham's Vegetable Compound

Asbestos Mines, Quebec.—"After the birth of my second child, I was always feeling tired, nervous and weak and had headaches, backaches and terrible pains every month. I suffered two years before I tried Lydia E. Pinkham's Vegetable Compound. I got four bottles at first and it did me a world of good. I would not be without it in the house now, and have another six bottles in. I recommend it to every woman I know."—Mrs. T. BARRITT, Box 114, Asbestos Mines, Quebec.

W. N. U. 1783

heard him singing merrily in his cabin.

"Strike me pink, but I do 'ope Donnie has waked up! What a pair, what a pair!" he said to himself.

In the morning Donald rode north on the gas-car to the scene of logging operations near the upper lake. He left orders with the men to bring Walnwright's baggage to the station. What Connie's absence would mean was brought forcibly to him as he met the trapper leading Pegasus and her pet deer down the trail to his cabin.

Two hours later Connie and her father stood on the station platform. Connie was dressed in an inexpensive blue suit, and wore a neat blue hat with a jaunty feather. Her golden hair was piled high in loops and coils that held a sheen of brightness like the shine of metal where the sun touched it. She appeared mystified and confused as the time for the train to pull out drew near. Andy, standing by her side, cursed softly as he saw her looking toward the mill, a look of poignant disappointment in her eyes.

"Donald 'ad to go up the line, Connie; guess something 'as 'appened," he mumbled.

At that moment Donald was heaping opprobrium on a recalcitrant gas-car that had died on his hands.

The conductor called "All aboard!" Connie turned to Andy. "Good-bye, Andy," she said sweetly, her eyes swimming with tears.

Andy took her gloved hand. "Good-bye, Connie," he returned, attempting a brave smile. "When are you coming back?"

"Maybe never." She choked as she stumbled up the car steps.

As the train started to move Connie came to the rear platform. A small, pathetic figure she seemed to Andy as she strained her eyes toward the north in a vain hope that she would see Donald. Andy stood in the centre of the track waving his hat until the flutter of Connie's little handkerchief vanished around a curve.

As the train roared through the cut, the last view of her loved valley flashed before her eyes. Her face strangely white, she clung to the brass rail and gazed with tearful eyes at the only home she had ever known.

As they passed the trapper's cabin, the noise of the rushing train sent Pegasus galloping madly about the pasture. With flying hoofs that tore up the sod he circled around the field, then came to the fence and with his beautiful head held high on the arched neck he looked with startled eyes at the speeding train.

With a gesture intensely eloquent, Connie flung out her arms. "Good-bye, Peggy! Good-bye!" She found her way to a seat and covered her face with her hands.

Donald flung himself from the gas-car before it had ceased moving. "Train gone, Andy?" he shouted.

Andy stood with arms folded. "Gone?" he yelled, "of course it's gone. Why in 'ell wasn't you 'ere?"

"I had to go up the line to look over some logs, and the car broke down," replied Donald bitterly.

"Of course," Andy with withering sarcasm, "the timber couldn't 'ave waited another day."

"Andy," asked Donald excitedly, ignoring the remark, "did Connie leave you her address?"

"Why the 'ell should she give me 'er address? 'Aven't you 'er address?" was Andy's unaccommodating reply.

"No, I haven't, I know that they are going to England, and that is all."

Donald sat down dejectedly.

Andy's face softened. "Do you like Connie?" he queried.

"Like her? I love her!"

"In that case I don't see 'ow she didn't let you know where to find 'er," puzzled Andy.

"She doesn't know that I care for her," said Donald gloomily.

Andy's mouth opened. He seized Donald by the shoulder. "Do you mean to tell me that you let that girl get away from you without letting 'er know hat you wanted 'er?" he demanded incredulously. "Strike me 'andsome," blazed Andy, "of all the blinkin' mutts in this 'ere world—you—you—" Speech failed him for a moment. "You let that dear little girl go away broken-hearted."

"Andy," interrupted Donald eagerly, "do you think Connie cares for me?"

For a moment, as he looked into

Zam-Buk

for
PIMPLES, RASH,
BOILS, ECZEMA ETC.

his friend's face, Andy was tempted to tell him of the scene after his fight with Hand. But the promise to Connie sealed his lips.

"Ow the 'ell should I know?" he mumbled. "But," he added with fine sarcasm, "if bone was ten cents a cubic foot you'd be a multi-millionaire, you blinkin' pie-eyed nincompoop—you—you—" He clapped a tragic hand to his brow. "You give me a 'eadache," and muttering to himself, he trudged up the hill.

The next day Donald went to Vancouver. He scanned the registers in hotels, inquired at docks and depots, but no trace of the Walnwrights could he find. He walked the streets with a forlorn hope that he might meet them. The hearts of many slender golden-haired girls were set fluttering that day as a tall, handsome young man subjected them to a close scrutiny.

Two days later he returned to the lake. That night he switched off the light and sat by the open window looking out on a night of stars, with a new moon making a ghostly light on the lake. An owl's mournful hoot was answered by the uncanny cry of a heron. The faint sighing sound of streams in distant gorges became a haunting chorus to this duet. He thought of Connie's cabin up the mountain, now cold and dark. How he would miss her! What an idiot he had been not to have known long ago that he loved her. He knew now that he had loved her from the first. Dear little Connie!

Donald walked the floor until midnight. Once in bed, he tossed restlessly until the early morning, then fell into fitful sleep in which he dreamed of a small, winsome face and big blue eyes surrounded by a wealth of golden hair.

September with its days of mellow sunshine passed. October brought

heavy hoar frosts that covered the earth with a robe of diamonds, and formed ice in the small pools and marshes. Winter comes early in the mountains. In mid-winter the valleys between the peaks of the Coast Range will have five feet of snow when, a few hundred feet below, where the warm waters of the Pacific lap the gentle slopes, the grass is green and there is none of the chilly whiteness that mantles the towering hills above.

There came a day in November when the air held a solmen stillness. The firs and pines pointed straight to the sky without a quiver in their branches. The brown earth seemed to say, "I am ready." The cry of the loon in it had a dreary sound, a note which seemed to say that winter was coming. Squirrels working in the tops of big pines increased their efforts. The cones, nipped off by their sharp teeth fell pattering to the ground, to be garnered by these busy little workers and secreted in their nests in hollow trees. The bear of the hillsides ate the frozen berry or the pulp of rotten log to cleanse its stomach before starting its long winter sleep in windfall or cave. Thus does Nature give to the wild things of the forest an instinct unknown to man.

(To Be Continued.)

An Oil That Is Prized Everywhere.—Dr. Thomas' Electric Oil was put upon the market without any flourish over fifty years ago. It was put up to meet the wants of a small section, but as soon as its merits became known it had a whole continent for a field, and it is now known and prized throughout this continent. There is nothing equal to it.

Sir Arthur Keith, British scientist, said that fish have no memory and no mind. He learned that in a laboratory, not in a trout stream.

Corns cripple the feet and make walking a torture, yet sure relief in the shape of Holloway's Corn Remover is within reach of all.

The popular breakfast entree, the grapefruit, is said to have been introduced into Florida in the sixteenth century, by the Spaniards.

Minard's Liniment relieves pain.

"Do you know Lord Heathmoor? I've often shot at his country seat." "And did you ever hit it?"

IT'S folly to suffer long from neuritis, neuralgia, or headaches when relief is swift and sure, thanks to Aspirin. For 28 years the medical profession has recommended it. It does not affect the heart. Take it for colds, rheumatism, sciatica, lumbago. Gargle it for a sore throat or tonsillitis. Proven directions for its many uses, in every package. Every drug store today has genuine Aspirin which is readily identified by the name on the box and the Bayer cross on every tablet.

ASPIRIN

Aspirin is a Trademark Registered in Canada

Capital Invested In Irrigation

Construction costs of ten major irrigation projects, now operating in southern Alberta amount to about \$31,800,000, or an average cost of approximately \$31 per acre for the area of slightly more than one million acres.

of spending many dollars on fancy creams and skin lotions, buy a 25c pkg. of Carter's Little Liver Pills and remove the constipation poisons. Your skin will be quickly cleared, and your health improved. All Druggists 25c and 75c red pkgs. **CARTER'S LIVER PILLS**

In the sky and on the highways modern motors, developing greater power and operating at higher speeds, demand better lubricants. Marvelube was developed to meet this demand. It is a better motor oil because it is made by better methods from a better crude petroleum.

Produced by the Special Marvelube distillation process, it is free from injurious sulphur and costly carbon. It has remarkable body, and because it is manufactured under the constant supervision of Canada's most expert refining technicians you are sure of unvarying quality and unending satisfaction.

Aircraft operators, the most exacting buyers of oil, prefer Marvelube because it has been proved in actual service that it affords longer intervals between engine overhauls. Marvelube insures smoother performance, longer engine life and lower operating costs for any car, old or new. There is a grade of Marvelube refined to meet the exact requirements of your car. Consult the Marvelube recommendation chart at good dealers' or at Imperial Oil Service Stations.

Active Building C.P.R. Acme To Red Deer

Construction operations have been commenced on the Acme-Red Deer section of the Canadian Pacific Railway, Fred Mannix, the well known railroad contractor, having been awarded the contract. It is understood that the contract covers some twenty-five to thirty miles of construction and that the new line will be completed fast. When Red Deer is connected up with Acme, it will mean that the Canadian Pacific Railroad will have another line to the East from Edmonton via Red Deer, Acme, Drumheller, Rosemary, striking the main line at the latter point. It will mean that Drumheller will then be on the main lines of both the Canadian National and Canadian Pacific.

Hens Fed Wheat Only Average 50 Eggs Per Year

Of the three phases of poultry raising—feeding, breeding and management, there is no doubt that feeding is commercially important and to be really profitable one must have a well bred-to-lay flock, take good care of them, feed good feed and keep the poultry house sanitary.

Low average egg production is undoubtedly due to feeding hens entirely on whole grain. Hens fed on grain and given all they want and allowed free range, average fifty eggs per year. Biologically tested mash has produced 300 egg hens at a small additional cost above grain fed hens. The objects of feeding are to maintain the body in good health, to promote the most rapid and efficient growth to obtain maximum egg production. A hen requires from 75 to 90 pounds of feed per year; 60 to 80 per cent goes to body maintenance. When it is expected to produce several times her weight in eggs in the course of a year and one that lays 200 two-ounce eggs produces approximately 44 oz. of egg shells, that is one of the reasons why minerals play such an important part in poultry feeding. If the feed is not sufficient in mineral protein or carbohydrates the bird's system is unquestionably severely strained. The ration for a laying hen must include the necessary ingredients in the right amount to nourish all parts of the body and make eggs. She may lay for some time at the expense of her body tissues but ultimately the result is lower egg production and higher mortality.

The materials that compose feeds are chemically classified as carbohydrates, fat, protein, ash and water. The carbohydrates and fat consist essentially of carbon and water, the function of which is to supply heat, energy and fat for the body tissues also yolk for the egg. The proteins form the flesh, feathers, tendons, blood and white of the egg. Proteins in the feed should be as nearly like the proteins forming the chicken and the egg as possible. Ash or minerals play an exceedingly important part in poultry nutrition. A laying hen needs a large quantity of minerals and to feed a ration deficient in minerals will tend to have weak bones and tissues, look thin and is subject to disease. Large amounts of calcium are required for bones, egg shells and tissues also quantities of phosphorus, sodium and chlorine are required for blood, bones and tissues. If a hen is not given a sufficient quantity of minerals she will either stop laying or decrease the size of the egg or produce weak shelled eggs. Feed which consists of large quantities of mash gives them large quantities of minerals thus enabling the flock to maintain body weight under the strain of heavy egg production.

The cod liver meal and oil in the mash not only supplies quantities of minerals but ensures full mineral nutrition to the other feeds in the mash, conditions the blood, strengthens the texture of the shell and health of the hen in winter and summer and also during the moulting season.

A fat woman is often a charming girl gone to waist.

ADSHEAD GARAGE - Didsbury

Follows Her Nose.

A bow rudder is a unique feature in the equipment of the Princess Norah, latest addition to the fleet of the British Columbia Coastal Steamships of the Canadian Pacific Railway. This facilitates the control of the vessel in the narrow channels in Pacific coastal waters and between Vancouver Island and the mainland linking the ports of Vancouver, Victoria, and Seattle.

The Princess is shown here in dry-dock, her bow rudder being plainly visible. On her initial voyage up the coast she carried a distinguished company, including Their Excellencies the Governor General and Lady Willingdon, Hon. Randolph Bruce, Lieutenant Governor of British Columbia, and his niece Miss Helen Mackenzie, and prominent residents of the Pacific coast.
